

The below products have been shared with you through the Amber website. Visit www.ambertiles.com.au for more Amber products.

Freestone Eco

If you've been trying to find a beautiful retaining wall that's environmentally friendly, Amber's Freestone Eco range ticks all the boxes. Freestone Eco has been manufactured from recycled glass aggregate which causes this range to have a uniquely smooth-surface finish that shimmers in the light.

Freestone Eco is available in a range of neutral colour tones so that your retaining wall will blend in seamlessly with any décor style. However, being crafted from sustainable materials doesn't make Freestone Eco any less durable. This stunning range has a maximum non-reinforced wall height of 3 blocks high as well as a cap.

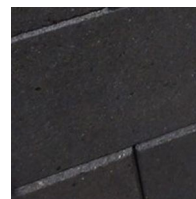

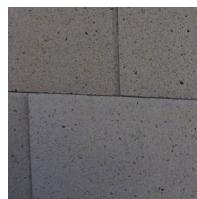

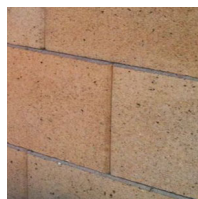

It's essential that Freestone Eco retaining walls are supported by a footing that's constructed of compact road base or concrete. Local council requirements may also apply.

Why choose Freestone Eco?

- Only available in NSW
- Blocks and caps available
- Various neutral colour tones
- Perfect for DIY and professional projects
- Manufactured from environmental friendly materials

To talk to us about using the beautiful, environmentally friendly Freestone Eco range on your next project, please visit one of [our stores](#) today. Or, browse more of our high-quality [Retaining Walls](#) now.
